Division: Business Services

Recommendation: Approve retention of seven (7) firms for the Electrical / Low Voltage Design Services in response to Request for Qualifications

Background/Rationale: The District will require the services of low voltage firms for use in support of construction, modernization and various facility projects. On November 18, 2022 the District issued a Request for Qualifications for Electrical / Low Voltage Design Services to establish a pool of low voltage firms. Proposals were due December 13, 2022. Seven (7) proposals were received and all were determined to meet the District's requirements for the proposed work.

Therefore, it is recommended that the 7 firms below serve in the District's electrical / low voltage pool to provide low voltage services on a project-by-project basis. A proposal will be requested for each project which will include a cost component.

Borrelli and Associates, Inc.
EDesignC, Inc.
Guidepost Solutions
HED Design
KMM Services, Inc.

LP Consulting Engineers
LEAF Engineers

Project assignments to each firm for specific projects will be determined by facilities staff and recommendations presented to the Board as service needs are established.

Financial Considerations: None

LCAP Goal(s): Operational Excellence

Estimated Time of Presentation: N/A
