

Sandra Green - Principal, Caleb Greenwood: "I am amazed at what the District Buildings and Grounds Department, Project Manager (Tim Peel) and contractors were able to accomplish in less than 3 months. Our school was totally transformed, what a change! Thirteen classrooms were replaced and major renovation took place in every other room. The staff and I truly appreciated having this major work, noise and disruption take place during the summer, and not during our teaching hours."

Katie Curry - Principal, Tahoe Elementary: The staff and I are looking forward to having air conditioning and new lighting and electrical....It's amazing the amount of work that needed to be done in such a short time. Though it seemed we wouldn't make it to open, we did!"

Kameron Thompson - Student: "The classrooms look bigger and better than before because they painted the rooms. We also have new boards."

Kelsey Doty - Student: "I like the way they put the carpets in. There's more carpet and less tiles. The desks are on the carpet and it's quieter."

Alison Burns - Student: "I like how they got the new doors in the classrooms. There are more windows and new lights and you can see better."

Haley Briscoe - Student: "I like the new blacktop because it's not bumpy like the old one. I also like when you check out books in the library you can just ring up the book like a store, on the computer. "
